

WHAT'S CONTROLLING YOUR PLANT?

88% of plants use automation systems beyond the obsolescence date.

50% of Downtime...

Half of all unplanned downtime is the result of aging equipment. Our Automation Lifecycle Analysis services can help you mitigate and even eliminate risk.

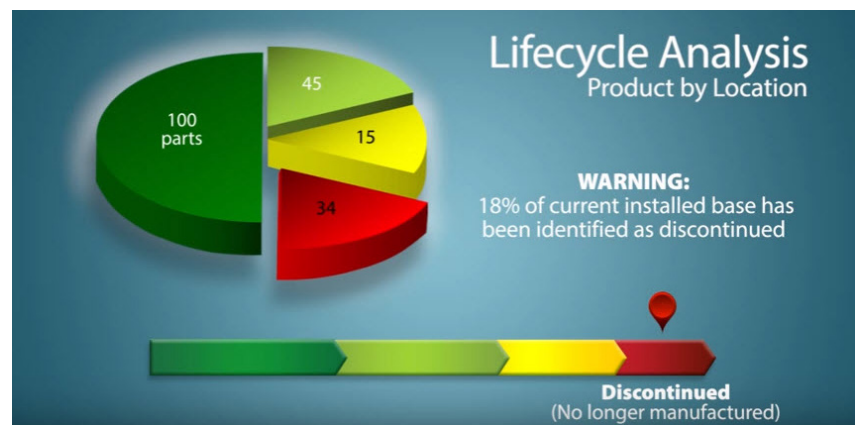

**Authorized
Service Provider**

A ROCKWELL AUTOMATION PARTNER

As a manufacturer today, leveraging your automation investment and keeping plant assets running efficiently can be challenging. Critical equipment failures and lack of adequate spare parts impact your ability to keep assets optimized. And aging equipment often does not provide the visibility or reliability you need.

Our Automation Lifecycle Analysis will provide you with actionable information, allowing you to make informed decisions about your lifecycle investments. Do you know the lifecycle status of your production equipment?

Don't wait until it is too late! Talk to your Horizon Solutions® Account Manager today to schedule an Automation Lifecycle Analysis, call (800) 724-4750.
