

I WANT TO SAVE ENERGY...

What are my LED options?

Good

TLED- LED Tubes

Advantages: Lowest cost.

Concerns: Warranty, old fixtures issues, ballast issues, and not as efficient as a matched system. Looks exactly the same as existing fixtures. Lowest utility incentives.

Better

LED Lamp & Ballast Retrofit

Advantages: Lower cost than full fixture replacement, better warranty than TLED, and very efficient.

Concerns: Existing fixtures are not designed for best light output (LED vs. fluorescent). Older fixture issues, yellowing, dirt and bugs. Incentives are more than TLEDs but less than new LED fixtures.

Best

LED Fixture Retrofit

Advantages: Most efficient in light output. Best warranty (typically 5 - 10 years). New, clean, and clear lenses. No yellowing and best appearance. Offers maximum utility incentives.
